

SubStateGame

```
classDiagram
    class SubStateGame
    class ConversationState
    class QuestState
    ConversationState ..|> SubStateGame
    QuestState ..|> SubStateGame
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'SubStateGame'. Below it are two boxes: 'ConversationState' on the left and 'QuestState' on the right. A horizontal dotted line connects the two lower boxes, with a solid arrowhead pointing upwards from the center of this line to the bottom edge of the 'SubStateGame' box. This indicates that both 'ConversationState' and 'QuestState' inherit from 'SubStateGame'.
